

Project Demo Planning

Date	10/07/2026
Team ID	SWTID-2026-5714
Project Name	OptiCrop: Smart Agriculture Production Optimization Engine
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Project Introduction	Explain the project objective and problem statement	1	Sriveni
2	User Interface	Show input fields (Nitrogen, Phosphorus, Potassium, Temperature, Humidity, pH, Rainfall)	1	Jaswanth
3	Crop Prediction	Enter sample values and predict the recommended crop	1	Sriveni
4	Model Explanation	Explain the trained Random Forest model and the prediction process	1	Kushal Sai Kumar Antarvedi

5	Testing	Test with different input values and verify results	1	Jaswanth
6	Conclusion	Summarize the project and answer questions	1	Kushal Sai Kumar Antarvedi

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Explain the need for crop recommendation and the project objectives.
2	Solution Overview	Explain the Flask application, Random Forest model, dataset, and user input parameters.
3	Live Feature Demonstration	Demonstrate the Home page, About page, Predict Crop page, and crop prediction using sample inputs.
4	Q&A Session	Answer questions and conclude the project demonstration.
