

Brainstorming & IDEA Prioritization Template

Date	01/07/2026
Team ID	SWTID-2026-5714
Project Name	OptiCrop: Smart Agricultural Production Optimization Engine
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	Sriveni yellaboyina	Crop recommendation using soil nutrients (N, P, K), temperature, humidity, pH and rainfall.	Machine Learning	1
2	Kushal Sai Kumar Antarvedi	Train a Random Forest model with StandardScaler preprocessing for accurate crop prediction.	Machine Learning	1
3	Kushal Sai Kumar Antarvedi	Develop a responsive Flask web application with Home, About and Predict Crop pages.	Web Development	1
4	Jaswanth marrivada	Deploy the application using Render for online accessibility.	Deployment	1

5	Kushal Sai Kumar Antarvedi	Create an interactive About page showing workflow, dataset information and technologies used.	UI/UX	1
6	Sriveni yellaboyina	Display AI-based crop prediction results with an attractive result interface.	UI/UX	1
7	Kushal Sai Kumar Antarvedi	Generate custom logo, favicon and modern agricultural theme for OptiCrop.	Branding	1
8	Jaswanth marrivada	Future enhancement: Fertilizer recommendation, weather API integration and disease prediction.	Future Scope	1

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
1	ML-based crop recommendation using Random Forest, soil nutrients and weather parameters through a Flask web application.	High	High	1	Yes
2	Weather API integration for realtime agricultural recommendations.	Medium	Medium	2	No

3	Fertilizer recommendation and crop disease prediction using AI.	Medium	Medium	3	No
---	---	--------	--------	---	----
