Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	Stage 1	Stage 2	Stage 3
Actions What does the customer do?	• Worries about which crop to select • Asks neighbor farmers for advice • Visits local fertilizer shop for suggestions	• Opens the OptiCrop web application • Enters soil nutrient values(N,P,K), temperature, humidity, pH and rainfall • Receives AI-powered crop recommendation	• Uses the recommended crop for cultivation • Applies suitable farming practices • Harvests the crop and compares productivity
Touchpoint What part of the service do they interact with?	• Neighbor farmers • Fertilizer shop owner • TV weather report	• OptiCrop home page • Predict Crop page • Crop Recommendation Result page	• Prediction Result page • Recommended Crop Information • Future Project Enhancements

Customer Thought What is the customer thinking?	• "If I choose wrong crop, I'll be in debt" • "Is there any scientific way to decide?" • "Soil test is too expensive for me"	• "This Website is easy to use and provides instant crop recommendations." • "Recommended crop has good market price" • "Finally I have clear steps to follow"	• "My yield increased by 20% this time" • "I saved money on fertilizer" • "I will use this app every season"
Customer Feeling What is the customer feeling?	At this stage, the farmer feels completely confused and worried about his crop selection. He is anxious about taking new loans for	When the farmer starts using the OptiCrop app, he feels immediately relieved to get instant crop advice without expensive soil tests.	After harvest, the farmer feels happy and proud of the increased yield he achieved by following the app's guidance. He feels financially

	farming because of previous losses. Without any scientific guidance on soil health, he feels helpless and frustrated with repeated crop failures every season.	The data-backed recommendation makes him confident in his decision. He feels hopeful about reducing input costs and is empowered because the app is simple to use even for nontechnical users.	secure due to better profits and has developed strong trust in using technology for farming decisions. He is now motivated to recommend the OptiCrop app to other farmers in his village.
Process Ownership Who is in the lead on this?	Farmer himself / Local fertilizer shop owner / Other farmers	OptiCrop Development Team / ML Model Backend / Government Agriculture Dept for data	Farmer himself / OptiCrop Support Team / Local Mandi officers for market price

Opportunities How can we improve this stage?	● Provide free soil health card awareness camps ● Create simple video guides on crop selection in Telugu ● Partner with local agriculture officers for village visits	● Add voice-based input for illiterate farmers ● Integrate real-time weather information ● Enable offline mode for areas with poor network	● Connect farmers directly to buyers via app to remove middlemen ● Add crop insurance guidance based on yield data ● Create "Farmer Success Stories" to build community trust
